Code	Core assessments	Practical provisions page(s)
WR01	Water regulations	N/A

Introduction

The Water Regulations assessment is a theory only assessment.

Certificate of competence

A certificate of competence will be issued if a candidate can meet the scheme requirements. Certificates of competence will be valid for the time period specified on the certificate.

Candidate prerequisites

Candidates should meet one of the following prerequisites for this assessment:

- Have an appropriate S/NVQ Level 2 or 3 or BTEC or equivalent
- Have an appropriate industry registration scheme, for example, Gas Safe Register, ACS, OFTEC 105E or equivalent.
- Have at least two years industry experience of installation of domestic heating and hot water systems currently un-certificated skills equivalent to NVQ Level 2 or 3 supported by witness testimony from an appropriate responsible person
- Have at least two years industry experience of design and advice services of domestic heating and hot water systems to NVQ Level 2 or 3 or equivalent supported by witness testimony from an appropriate responsible person.

The assessment paperwork consists of:

- theory question paper; WR01 (2 attempts to achieve the 100% required for a pass)
- theory answer sheet; TAS
- overlay; WR01.

The reference material consists of:

- Water Regulations Guide
- The Water Supply (Water Fittings) (England and Wales) Regulations 1999
- The Water Supply (Water Fittings) (Scotland) Byelaws 2014
- The Water Supply (Water Fittings) Regulations (Northern Ireland) 2009.
