- training materials
- PowerPoint
- assessment materials.

Code	Core assessments	Practical provisions page(s)
BEE2	Basic energy efficiency	N/A

Introduction

The basic energy efficiency assessment is a theory only assessment. This package is designed for candidates who will be giving basic energy efficiency advice to customers, typically meter installers, local authority or housing association administration personnel.

Certificate of competence

A certificate of competence will be issued if a candidate can meet the requirements laid down within this document. Certificates of competence will be valid for the time period specified on.

Candidate prerequisites

There are no prerequisite qualifications for the basic energy efficiency assessment.
