

Check that you are eligible

Qualifications you already hold

A pre-requisite to registering on the EWA is that **candidates must hold at least a relevant Level 2 qualification* as shown in the tables below:**

*If you do not have the minimum Level 2 technical qualification but have significant industry experience, you may be eligible for the EWA Entry Test. Find out more [here](#).

Table A These should provide evidence of most of the underpinning knowledge but a technical discussion is needed to cover new technology areas detailed in the Skills Scan, unless these are already evidenced by additional Continuing Professional Development (CPD) qualifications.

NOTES

- **Non-UK qualifications:** any candidates holding electrical qualifications from outside of the UK will need to undertake the Ecctis mapping process (the specific electrotechnical mapping route and not the general mapping). Candidates can not be enrolled with non-UK qualifications without proof of this mapping.
- **Please note:** A qualification in Inspection & Testing, Periodic Inspection or Initial Verification does not meet the requirement for an underpinning technical certificate.
- The City & Guilds Level 3 Certificate in the Building Regulations for Electrical Installations in Dwellings (2393-10)(Part-P Building Regulations) is not sufficient to demonstrate underpinning knowledge.

If you hold another equivalent qualification not listed above which you think is relevant to the Knowledge required, please contact TESP for further guidance via www.the-esp.org.uk/contact-us.
