

Experienced Worker Assessment

Entry Test - eligibility and process

Before you start

Make sure you're eligible for the EWA!

Review the experience requirements in the Skills Scan for your chosen route and be certain:
Are you currently working day-to-day on the full scope of work contained within the Skills Scan?
Can you generate this workplace evidence within 18 months?

You will not be allowed access onto the Entry Test unless you can demonstrate you meet the main EWA criteria.

If you are confident you are eligible for the EWA

Review the **Test Coverage information** to confirm you have all the underpinning knowledge required for the test.

If you proceed, we will verify that you have this underpinning knowledge as part of the application process.

If you have all the listed underpinning knowledge

Complete an application form followed by a Skills Scan self assessment. A follow-up technical discussion will be arranged to review and verify the information you supply in order to confirm that the EWA and Entry Test is the right route for you.

Working with your training provider

Once we validate your eligibility for the EWA Entry Test we will submit the Overview & Candidate Application Form to TESP for approval.

Once approved, test date booked

Once TESP has approved the Entry Test application, a test date can be booked. The tests are run within a quarterly scheduled window.

Test passed - Proceed to full EWA registration within 6 months

Once you have passed the chosen Entry Test, you can proceed to full EWA registration. You will have a maximum of six months from passing the test to enrol on the EWA.
